

Immerse Virtual Studio - All Access - 1.2.0

Release Notes:

- + Adding support for dynamically adding new headphones on the fly
- + Notification in Headphone menu when a new asset is added
- + Add master volume bi-directional slider in the LU meter
- + Added LU and RMS meters
- + LU meter now shows when the limiter is engaging
- + A new headphones tab where HP EQ can be bypassed and amount of EQ can be controlled
- + Added compatibility with M1 machines
- + Fixed bugs with Audirvana Studio. Works with Jriver 28, which will be released soon.
- + New UI for Plugin tutorial. While tutorial is playing, the plugin is blocked/darkened in the background
- + UI changes during Onboarding
- + Allowing users to login when the Trial is expired
- + Fix for sandboxed applications like Djay Pro and Garage Band
